

I'm not robot!

We know the kingdom. Now what?

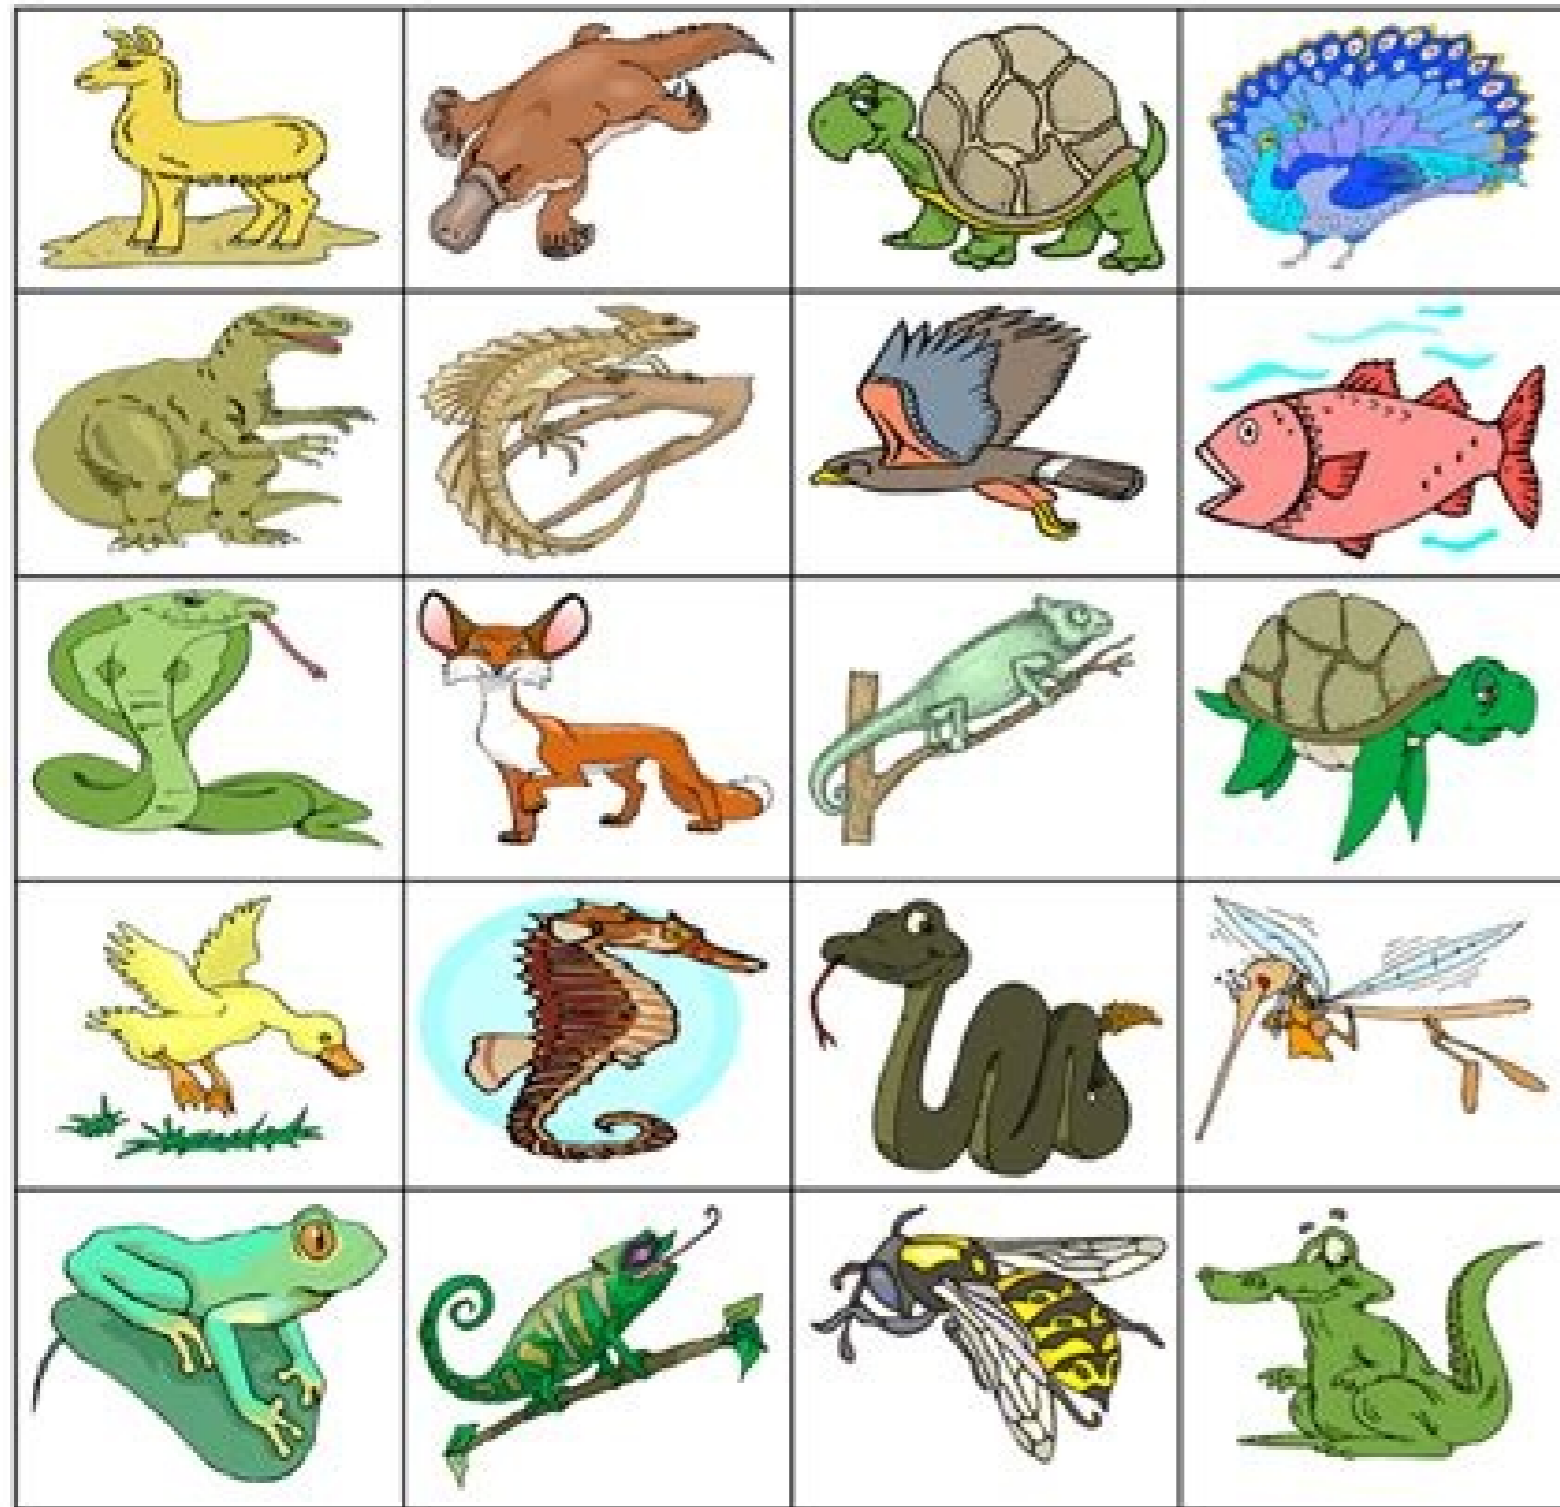

Name: \_\_\_\_\_

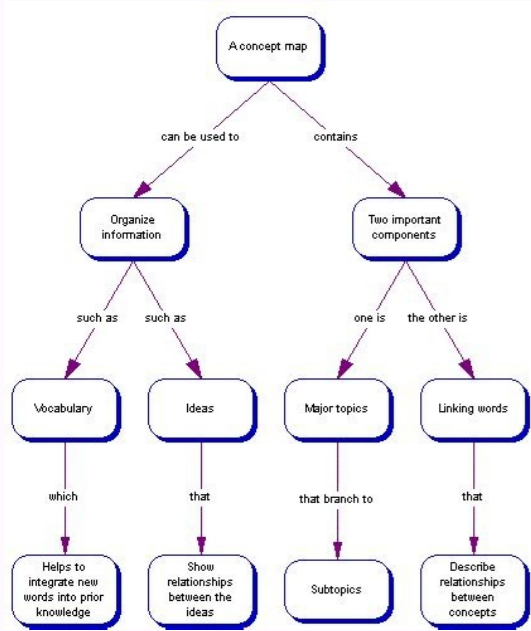

## What is a Reptile?

A **reptile** is a cold-blooded animal that breathes with lungs and has scaly skin. Most reptiles lay eggs and have four legs, but not all!

**Directions:** Look at all the animal pictures. Circle the pictures that show reptiles.

# A question of life or death

## Background knowledge

All living things carry out certain life activities. They reproduce, grow, and obtain food or nutrition. They all respire to obtain energy. Some respire by using gases from the air. All living things must excrete or get rid of the waste they produce. Living things also move. They may move to get food or run away from an enemy. Last, living things are sensitive to the environment around them. For example, some feel pain or heat.

## Science activity

The words below describe some of the life activities of living things. Draw a line from each word to the picture that shows it happening.

- Reproduces
- Excretes
- Respires
- Grows
- Feeds
- Senses
- Moves

## Science investigation

Place some pill bugs or crickets in a large covered jar with holes in the lid. Add a cut up potato and some fish food. Observe the critters and note down all of their life activities. Do they engage in every activity? Design and conduct an experiment to determine the critters' sensitivity to their environment.

Classification of living things worksheet biology. Classification of living things worksheet answers. Classification of living things worksheet pdf.

Last updated 1 July 2014 Resources for an activity where students can cut out the different cards and sort out the 36 different living things into their different groups. A nice way of going through the process of breaking each group down into its smaller constituent groups. Creative Commons "Sharealike" Select overall rating (no rating) Your rating is required to reflect your happiness. Write a review Update existing review It's good to leave some feedback. Close Key stage: KS 4 GCSE Subjects: Biology; Single Subject, Biology; Combined Science, GCSE Boards: AQA, AQA Trilogy, OCR 21st Century, OCR Gateway, Pearson Edexcel, Curriculum topic: Inheritance, Variance and Evolution, You and Your Genes, Global Changes, Natural Selection and Genetic Modification Curriculum subtopic: Reproduction What is the Genome and What Does It Do? Monitoring and Maintaining Health Natural Selection and Genetic Modification Difficulty level: ---- OR ---- Preview Activity Similarities and Differences FLIP FLAP KINGDOMS ACTIVITY Most of you have finished this however for those who haven't, I have outlined what you need to write for each dot point: 1. Multicellular OR Unicellular (one kingdom is both) (multi - made up of many cells, uni - made up of one cell) 2. autotroph - contains chloroplasts OR heterotroph - needs to consume food OR decomposer - breaks down wastes 3. does it contain a nucleus? 4. does it contain a cell wall? Identifying living things into their kingdoms worksheet You need to cut out each image and their name and place them into the correct kingdom You need to research using your textbook/google that you have the correct answers, don't just guess. EG: coral and kelp DO NOT belong in the plant kingdom even though they look like plants. Activities --> Classification of Organisms --> Taxonomic Ranks OR Kingdoms of Classification Excellent power point. I am covering all animals after summer holidays and this will be a great review of previously covered material and intro to our new learning. Thank you. Empty reply does not make any sense for the end user
