Over 7 millions of people in the United States sà £ Â thought to have angina. The generally associated with ARTA © narrowed holiday found in the disease would ARTA © coronÃ; ria. This narrowing à © £ acumulaçà caused by the plates (thickening the coating) in ARTA © holiday due to a process called atherosclerosis. With angina, the affected persona s coraçà £ o can receive enough blood for diÃ; rias activities, but ARTA © holiday can nA £ being able to provide adequate blood and oxigênio during periods of higher demand, as exercÃcio phasic, phasic emotional or stress, and temperature extremes. There are three main types of angina: Stable Angina The © characterized in padrÃues previsÃveis periods of symptoms and discomfort that occur during stress or exercÃcio perÃodos. © This pain is usually relieved by rest and / or treatment with nitroglycerin or other suitable medicaçà the £. Many people with this type of angina can live a relatively normal life for many years, but some vain £ the progress over time, or relatively rÃ;pida way, unstable angina caused by slow à © £ formaçà the plates composed primarily of fibrosis (scar tissue). unstable angina, acute coronÃ;rias sÃndromes one of which includes cardÃaco attack, © characterized by the mudança in Padra £ episódios angina, which most often occur at rest and / or the reply that does £ treatment. usually a sign that the persona s £ condiçà the estÃ; worsening. The pain Algua © m Experiences with unstable angina may be more severe and prolonged than that of Stable angina. People with angina is unstable £ the most at risk of a cardÃaca attack, severe arrhythmia and cardÃaca stop. © is an acute emergÃancia and should be evaluated and treated immediately. unstable angina à ocurdÃaca stop. material spills into the container, the coágulos form. Variant angina (angina Prinzmetalà ¢ s) often occurs during rest perÃodos, usually at night. The cause à © a spasm of Arta © coronária laughed. Many people who têm this type Tamba © m têm severe atherosclerosis in at least one major vessel sanguÃneo for the £ coraçÃ. © m tamba can occur, although with much less frequÃacia in persons with the disease or vÃį lvula cardÃaca the high rush £ £ sanguÃnea the controlled nA (the hypertensive £), and can be seen with the use of cocaine and methamphetamine. This type of angina caused by spasm of the © © ARTA holiday, narrowing them temporarily, but without causing any permanent damage. Symptoms of angina appear and then may or not the £ can disappear when the person estÃ; at rest. A person may have chest pain, discomfort and / or the rush £ or Experience of pain is pain that is felt ¢ that the left shoulder braÃso, back, or mandÃbula. Angina can be more difficult to identify in some elderly when tÃam symptoms such as abdominal pain after eating (due to increased demand for blood to digest £ o) or have back or shoulder pain (which may be atribuÃdo TOA arthritis). The amount of activity that © Required to trigger an anginal episode and symptoms involved vary from person to person and can vary between tamba © m episódios and over time. Since the disease of Arta © ria coronÃ; ria tends to be progressive, angina may worsen over time, with symptoms somewhat more serious, the more frequent, and / or a lower response to rest and treatment. The aim of testing for angina is to distinguish between: chest pain that is not related to the heart, such as, due to the injury of the skeletal muscle pain in the chest that is © due to treated angina and do not damage the heart in the chest pain that is due to the heart, and there is no When someone shows the emergency room with an acute coronary week - a group of symptoms that suggest cardiac injury - are evaluated with a variety of laboratory and non-laboratory tests.
